

Multi-disciplinary Team

Telethon Speech & Hearing provides a multi-disciplinary approach to ensure the best outcomes for all children diagnosed with a hearing loss.

Audiologists

Provide regular monitoring of hearing and middle ear status of all children enrolled in the Telethon Speech & Hearing Chatterbox - Early Intervention program.

Auditory Verbal Therapists/Speech Pathologists

Provide strategies and techniques to facilitate optimal acquisition of speech and language through listening. Parents and caregivers are active participants in therapy.

Occupational Therapist

Will assess and monitor a child's motor skills development, balance and coordination, sensory processing development, play skills and self-care and routine tasks.

Psychologists

Support the emotional and social development of the children and families.

Telethon Speech & Hearing

Early Intervention for children with a hearing loss

Early Intervention Services

Early Intervention has an important role to play for a child with hearing, speech and language delays and Telethon Speech & Hearing have an extensive history of success in this area. We assist children to reach their full potential and become participating members of their community.

In 2017, our Program Excellence Assessment revealed that 87.5% of children demonstrated age appropriate language.

Telethon Speech & Hearing is a Western Australian based, not-for-profit, registered charity providing a range of specialist services to children with hearing, speech and language delays.

Our teams of qualified specialists help support children with hearing loss through our Chatterbox - Early Intervention Program which includes a team of Audiologist, Auditory Verbal Therapist, Occupational Therapist, Psychologist and Speech Pathologist.

Testimonials

"My daughter has thrived in her Chatterbox Program; it's great to have specialists on hand who can help identify things we need to be mindful of in daily routines"

– Mother of child in the program

" Our individual sessions are amazing, we wouldn't change a thing. This session is enjoyed thoroughly by my son. He has grown so much in the first semester alone! The staff are amazing & are always giving me feedback on how he is going."

– Mother of child in the program

" We don't know what we would do without the support of everyone at Telethon Speech & Hearing. Thank you!"

– Father of child in the program

Therapy Sessions

All children and their families in the Chatterbox - Early Intervention program are encouraged to attend individual therapy and a therapy group each week during school terms. These groups are facilitated by members of the early intervention multi-disciplinary team.

Therapy Groups

Our groups are structured around age cohorts. Groups are enriched with support from the multi-disciplinary team which may include Early Childhood Teachers, Speech Pathologists, Auditory Verbal Therapists, Occupational Therapists and Psychologists.

Connect and Grow (0 - 1 years old)

Toddler Time (1 - 2 years old)

Little Explorers (2 - 3 years old)

Little Learners (3 - 4 years old)

Skills for School (4 - 5 years old)

Our early intervention program is a family-centred approach with emphasis on assisting the child to reach their full potential. The services are individualised to each child's needs and integrate many disciplines.

Individual Sessions

Sessions are provided by highly skilled professionals who coach and guide parents in strategies and techniques to assist their child's development of listening, language and speech. Families also have access to sessions with our multi-disciplinary team which includes Occupational Therapists, Psychologists, Audiologists and Speech Pathologists.

Approach

The Chatterbox Program aims to provide a flexible family centred service that meets the needs of the child and whole family. Family Centred Practice is an approach that recognises the role the family plays in an individual's life. We as therapists develop a working partnership with your family and your family's priorities drive the planning and intervention. We also incorporate the Auditory Verbal approach into our therapy. Therapy sessions focus on education, guidance and the application of techniques and strategies that promote the acquisition of spoken language through listening.

Telethon Speech & Hearing is a Registered NDIS provider.

Depending on your child's eligibility, parts or all of our programs may be covered under the NDIS. Contact us for a personal discussion.
